

PASADENA, CA – OCTOBER 2015. Obsolescence announcement.

Kinematics is announcing End-of-Life of the Central Recording System Model **Dolomite**. The Dolomite was introduced as a Central multichannel Digitizer/Recorder based on the Granite 12-, 24-, and 36-channel versions. Kinematics decided to discontinue the Granite, and therefore the Dolomite, effective October 1, 2015.

The Dolomite and Granite will continue to be supported through October 1, 2018. Kinematics will continue to repair the instruments for as long as components will remain available.

Kinematics recommends the multi-channel Central Recording System Model [Dolomite+](#) instead, which is based on the new Obsidian 12X, 24X and 36X versions.
