

**PASADENA, CA – OCTOBER 2015. Obsolescence announcement.**

Kinematics is announcing End-of-Life of the Seismic Switch Model **Mitigator**. The Mitigator was introduced as a cost effective but reliable device to shut down elevators, escalators and other industrial critical equipment during a strong earthquake. Kinematics decided to discontinue the Mitigator effective February 28, 2015.

The Mitigator will continue to be supported through February 28, 2018.

Kinematics suggests the new Seismic Switch Model **Mitigator+** instead. The new version was designed to meet the following standards and codes: ASCE 25-97, ASME A17.1 and CA Code 3137.
