

PASADENA, CA – OCTOBER 2015. Obsolescence announcement.

Kinematics is announcing End-of-Life of the Strong Motion Accelerograph Model **ETNA**. The ETNA was introduced as a cost effective strong motion recorder. Kinematics decided to discontinue ETNA effective October 1, 2015.

ETNA will continue to be supported through October 1, 2018.

Kinematics suggests the strong motion accelerograph [ETNA 2](#) instead. The successor of the ETNA accelerograph with more than 3,300 units in operation worldwide, the ETNA 2 meets both the reliability and the cost-effectiveness criteria many of our customer appreciate.

***** This Obsolescence announcement does not apply to the version Etna-NPP used in Nuclear Power Plants monitoring marketplace *****
