

PASADENA, CA – AUGUST 2015. Obsolescence announcement.

Kinematics is announcing End-of-Life of the Strong Motion Accelerograph Model **TSA-SMA**^(*). The TSA-SMA was introduced as a cost effective strong motion recorder for indoor installations. Kinematics decided to discontinue TSA-SMA effective July 31, 2015.

TSA-SMA will continue to be supported through July 31, 2018.

Kinematics suggests the strong motion accelerograph [Obsidian](#) instead. The successor of the Basalt accelerograph with more than 1,200 units in operation worldwide, the Obsidian meets both the reliability and the cost-effectiveness criteria many of our customer appreciate.
