

PASADENA, CA – SEPTEMBER 2017. End-of-Life announcement.

Due to the insufficient demand for the latest generation of ultra-high dynamic range of accelerometers introduced in 2015, Kinematics is announcing End-of-Life of Models Episensor 2 (ES-T2) and Shallow Borehole Episensor 2 (SBEPI 2). Kinematics decided to discontinue these products effective September 27, 2017.

The Episensor 2 and SBEPI 2 will continue to be supported through September 26, 2018.

Kinematics suggests the accelerometers [Episensor \(ES-T\)](#) and [Shallow Borehole Episensor \(SBEPI\)](#) instead, also exceptional sensors with thousands of units in operation worldwide and under continuous improvement.
