

## OasisPlus Earthquake Business Continuity

Uninformed decision-making during an earthquake increases the potential for panic, injuries, and costly downtime.

Buildings in regions with earthquake hazards are especially subject to business interruption. OasisPlus provides the tools and information you need to control impact, minimize downtime, and reinforce crisis management with effective communications before, during, and after an earthquake.

### MODERN MONITORING

#### How much did the building move?

Captures critical structural performance data in real-time for maximum reliability and accuracy.

### ALARM SYSTEM

#### How much is too much?

Delivers alerting on exceedance of building parameters, turning data into actionable information.

### EARTHQUAKE RESPONSE

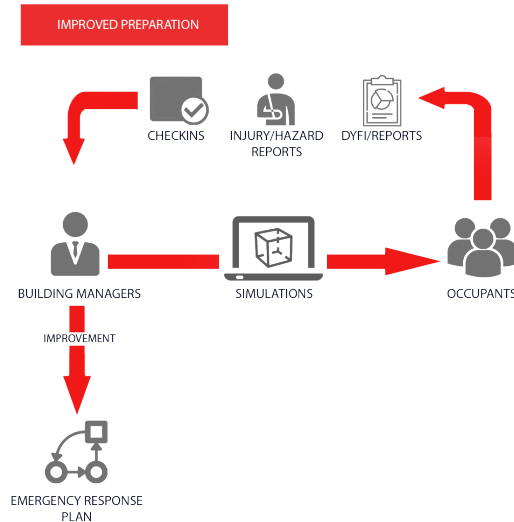

#### Is there a safety concern?

Provides the building and occupant information you need for quick and confident decision making.

### COMMUNICATION PLATFORM

#### How to communicate the instructions?

Enables 2-way communication with occupants, facilitating situational awareness and information dissemination.

## BENEFITS

OasisPlus puts a complete earthquake management solution under your control.

- Avoid unnecessary evacuations and business process interruptions to secure ongoing critical operations
- Enable better-informed decision making during an earthquake to assure continuity of operations
- Minimize expensive downtime and distress
